

Platteville Business Incubator Engineering RFQ Q&A

Pbii.org/About Us/Opportunities

Who is preparing the Grant Application?

Platteville Business Incubator and Southwestern Wisconsin Regional Planning Commission.

Who did you send the RFQ to?

In addition to posting it in the paper and putting it on the website, we contacted IIW, KD Engineering Consultants, MSA Professional Services, Delta 3 and Mathew Lundh Architect.

Where did you get the list of firms to send it to?

The City of Platteville.

Will you be doing interviews?

Interviews are not planned for at this time.

Will you be giving tours?

Tours are not planned for at this time. There is a video tour on the website under the About Us/Opportunities tab.

Do you have specifics on what you want to create or accomplish?

We do not have specifics. It is likely to include reconfiguring the central spaces and entrance to better suit the needs of current and future tenants.

Can you clarify what our services might entail for “Securing EDA submittals whether they are engineering related or grant administration related”?

Respondents need to demonstrate grant administration capability in case PBII needs to contract for those services. EDA submittals are standard with EDA construction projects, so demonstration of this experience will suffice.

Clarify what our services might entail for “Maintenance for all required records for at least three years after PBII makes the final payment and all pending matters are closed”?

The engineering firm is required to maintain adequate documentation for all activity and expenses for the project in a commonly retrievable format and made available upon request in a reasonable time frame.
